

# HTPG4 Agitators

- HTPG4 -

**HTPG4 Agitators**  
For tank wall and bottom mounting

## APPLICATIONS

- Agitators allow mixing of liquids, liquid and solids, homogenization.

## VERTICAL HTPG4 Agitators

### APPLICATIONS

- Mixing, liquids, heat transfer
- Crystallization
- Homogenization

### ADVANTAGES

- Minimum shearing of fragile products
- Low power consumption
- Maximum pumping flow
- Heat transfer

**HTPG4** propeller, patented design induces a big axial flow and avoid radial leaks. Two upward and downward flows are thus generated. Such aerodynamics is the key to the good performance of **HTPG4**.
